

## ORDER ANNOUNCEMENT

---

### Power-Packer provides hydraulics for VW Golf's Convertible Roof

Oldenzaal, The Netherlands, June 20<sup>th</sup>, 2011

Power-Packer, a leading name in motion control systems, has been awarded the hydraulic convertible top actuation system order for the VW Golf, the cabriolet version of the Volkswagen Golf. According to Bart Kroeze, Sales Manager Power-Packer Automotive Division "With the support of the entire organization we were able to finalize this multi-million euro order with Webasto-Edscha Cabrio GmbH in June of this year. We are pleased that our customer has awarded us with this vote of confidence".

Power-Packer will produce the hydraulic units for the VW Golf Convertible for the next 6 years (2011 – 2016), with an approximate total volume of 170.000 units

Power-Packer was selected thanks to its excellent development support, a proven track record of industrialization of complex hydraulic systems in the automotive market (against specification, timing and costs) and an extensive design knowledge to enhance the look and feel of a Convertible Roof. Through the effort and dedication of Power-Packer's employees, the company is continuously looking to strengthen their relationships with customers.

#### About Power –Packer

Power-Packer, with headquarters in Oldenzaal, The Netherlands, is a market leader for motion control systems. As an independent subsidiary of the American Actuant Corporation. Power-Packer supplies specialized high-quality products, which include the development and manufacturing of (electro) hydraulic actuation systems for a large number of applications in the automotive, truck, marine, agriculture and patient handling market. Power-Packer develops, assembles and markets actuation systems for customers on a global basis including OEM's and Tier 1's in diverse end-markets.
